Home Health Services

Dear Provider:

Effective for dates of service beginning July 1, 2003, Home Health Services rates will be reduced by 10%. Each home health agency is reimbursed a specific rate per visit for covered service. The specific rate per visit is based on the total of the agency's inflated base rate, supply rate and any efficiency incentive applicable to the agency. These are subject to rate ceilings.

The banner message will run for only four cycles with the remittance advices and can also be found on the GHP Web portal at www.ghp.georgia.gov. After the cycle has ended the information can be found in the archive banner messages.
